

Siddharth Shankar

.NET Backend Developer | Delhi, India | 8178829221 | sidds4970@gmail.com | [linkedin.com/in/siddharth-shankar10](https://www.linkedin.com/in/siddharth-shankar10)

PROFESSIONAL SUMMARY

.NET backend developer with 3 years of experience building HIPAA-compliant CMS Medicare enrollment services - ASP.NET Core Web APIs, C# business and data access layers, SQL Server stored procedures, and SSIS/Liquibase data pipelines - with hands-on release ownership in Bitbucket, Bamboo, and OpenShift.

SKILLS

Languages & Frameworks: C#, .NET 8, .NET Core, ASP.NET Core Web API, ASP.NET MVC, Entity Framework Core, ADO.NET, LINQ, T-SQL, XML/JSON

Data & ETL: SQL Server, Stored Procedures, Query Optimization, Schema Design, SSIS, Liquibase, Apache Airflow, Tableau, SSMS

Cloud & DevOps: Docker, Kubernetes, OpenShift Container Platform (OCP), Bitbucket, Bamboo CI/CD, Git, SonarQube, Checkmarx, Artifactory

Architecture & Practices: Microservices, RESTful API Development, OAuth 2.0, Batch/ETL Processing, Performance Tuning, Unit Testing, Code Review, Release Management, Agile/SAFe, Requirement Analysis, Technical Documentation

Domain: US Healthcare, Medicare Enrollment, CMS Reporting (DTRR, LIS, HPMS OEC, DSNP), HIPAA Compliance

WORK EXPERIENCE

CARELON GLOBAL SOLUTIONS

Gurugram, Haryana

Associate Backend Developer (.NET)

Oct 2023 - Present

- Delivered the 2027 Early Application Processing release for the GBD Medicare enrollment platform end to end, covering .NET business and data access layers, service contracts, and SQL Server DDL/DML, across 8 production releases.
- Designed and implemented the Enhanced County Determination Hierarchy for application processing, adding stored procedures, tables, and DAL changes that removed county-source mismatches across paper, electronic, and ACS enrollment flows.
- Built the Balance & Control interfaces reporting framework, including table DDL, stored procedures, restricted views, and automated scripts that feed Tableau dashboards used for CMS electronic enrollment reconciliation.
- Modernised legacy RestSharp components into a shared OAuth 2.0 token library and upgraded the DAL, .NET, and SQL Server versions, remediating Checkmarx and dependency vulnerabilities across 5 repositories.
- Automated database delivery with Liquibase changelog generation and release script ordering, cutting manual release preparation effort and eliminating recurring script-sequencing failures.
- Developed and maintained SSIS packages for letter digitalization, bounce-back retriggers, GRS LIS PDP layout changes, HPMS OEC file layout updates, and DTRR/LIS TRC processing.
- Authored and merged 205 pull requests across .NET, SQL, and SSIS repositories and reviewed peers' code, while coordinating adhoc and monthly production deployments and post-release production and staging validations.
- Wrote unit tests for paper, electronic, and USPS-validation enrollment flows and supported QA cycles, resolving defects in enrollment staging status, letter generation, and reporting output.
- Closed 267 Jira items over two years in a SAFe Agile team and documented design approaches, technical analysis, and support handoff guides in Confluence.

PROJECT EXPERIENCE

Capstone Project with Research Paper

Phagwara, Punjab

Early Forest Fire Detection and Control System

- Designed and implemented an IoT-based early forest fire detection system using multi-sensor data (temperature, humidity, smoke) to improve environmental monitoring reliability.
- Processed and analysed over 1 million real-time sensor data points and applied supervised machine learning to identify more than 1,000 fire-risk patterns for early warning.
- Built scalable data pipelines for sensor ingestion, preprocessing, feature engineering, and anomaly detection, plus a real-time alerting workflow that reduced detection delays.

Open Source

Online

Portfolio Website Developer

- Launched a responsive portfolio website using HTML5, CSS3, and JavaScript, deployed on GitHub Pages and showcasing 5 projects. Link - <https://siddharth161.github.io/NewPortfolio-1stMarch/>
